

APHISIT DANCHAO DANG

Software engineer

Phone +66 623469060 **GitHub** github/aphsx **Email** aphisitdanc.work@gmail.com Bangkok Thailand

SUMMARY

Software Engineer with 2+ years of production experience delivering end-to-end, full-stack web platforms and scalable production systems. Proficient across the full software lifecycle-architecting enterprise-scale backend architectures and developing responsive interfaces. Adaptable, tech-agnostic engineer proven in quickly mastering emerging technologies through hands-on delivery of multifaceted projects, converting complex domain logic into robust production releases.

TECHNICAL SKILLS

Languages Go, TypeScript, JavaScript, Python, SQL, Dart, Java, C++

Frontend React, Next.js, Flutter, Tailwind CSS, HTML/CSS

Backend Go (Gin), Node.js (ElysiaJS / Express), RESTful APIs, Microservices, WebSockets

Databases & Caching PostgreSQL, Microsoft SQL Server (MSSQL), MySQL, Redis, SQLite

Tools & Architecture Git, Postman, System Design, Agile/Scrum, SDLC

EXPERIENCE

Fullstack Developer (Contract) | August Ten Digital Development Co., Ltd.

May 2026 - Aug 2026

TPA Insurance - Claims Core System

- Engineered full-stack features within a decoupled microservices architecture, integrating responsive Next.js frontends with standalone Go services via RESTful APIs.
- Implemented Primary/Replica read-write splitting in Go
- Translated complex insurance business rules into resilient backend validations (e.g., date overlaps, duplicate conditions, and plan effective-period constraints) at the API layer.
- Isolated and resolved critical UI/API defects during UAT using ticket-driven diagnostics to ensure stable production releases.

Research Assistant | Center of Specialty Innovation (CoSI)

2024 - 2026

- Led end-to-end development of 5+ production web platforms, taking ownership across the full product lifecycle from requirements analysis and architecture to implementation and deployment.
 - Adapted to and applied diverse technology stacks per project constraints, implementing tailored frontend, backend, and database solutions across ERP, e-learning, and tourism domains.
 - Engineered robust relational data models and APIs, translating varied business requirements into normalized schemas and efficient backend services.
 - Collaborated within cross-functional teams, coordinating with researchers and stakeholders to iterate on feedback and ensure stable system deliveries.
-

PROJECTS

ML AI Customer Prediction | 1Moby Co., Ltd.

- Developed an end-to-end ML workflow and Customer 360 dashboard to automate data ingestion and model predictions, providing the business team with a centralized dashboard for customer data and predictions.

BillGang Collaborative Expense Splitting App | Mobile App

- Developed an expense-sharing mobile app featuring OCR and AI receipt scanning, backed by Bun (ElysiaJS), Neon DB, and Cloudflare R2 object storage.
-

EDUCATION

Bangkok University

Bachelor of Science in Computer Science (GPA 3.51)

2023 - Present | Expected Graduation May 2027

Relevant Coursework Database Systems, Data Structures & Algorithms, Internet of Things
